Dear DESHMUKH NAVNATH VISHWANATH

Congratulations!

We welcome you to join GDC AI Workforce. A growing team of students working with industry experts to develop and build digital public goods, driving nation-building missions.

You have been successfully onboarded to Pupilfirst LMS and will have access to the WD101, WD 201 and WD 301 courses.

Our Web Development (WD) courses will provide you with full-stack developer skills upon completion.

Ready to dive into the world of web development?

Here are the next steps:

- 1. Getting Started:** In the program, you will follow a self paced learning by going through all the course content and completing the basic training
- 2. Course Access :** As the first step, you need to sign in to Pupilfirst LMS to access the courses using this [sign-in link](#).
- 3. Follow Course Timelines :** GDC Fellowship track follows a strict timeline of **14 weeks from the date of onboarding** for completion of courses. Failure to meet the deadline will lead to off-boarding from the program.

Please note that your deadline to complete all the 3 courses falls on 12-03-2025.

For better experience, we recommend you to complete the course in the right sequence:

WD101 ▶ **WD201** ▶ **WD301**

Internship

Once you complete the training, you will undergo an assessment. Based on your performance, selected students will be added to the intern pool.

As part of the intern pool, you will be required to complete a set of tasks. Successful completion of these tasks will lead to a 6-month remote internship, where you will work on impactful Digital Public Good projects.

More info will be shared upon course completion.

All the best

Team Pupilfirst
